

Traditional Herbalist Level 1b Schedule

All of the Traditional Herbalist Level 1b courses were formerly offered by George Brown College. However, due to program changes at George Brown, some of these courses are no longer offered. In order to address this and to accommodate the individual needs of students, we have indicated alternative distance learning courses that are available from different colleges through Ontario Learn. Students may also explore courses offered by colleges in their area. Any courses that are equivalent to any of the Level 1b courses in content and depth may be substituted. It is necessary to provide information on alternative courses to the school. Acceptance of any courses as equivalents to courses in the Level 1b program requires the approval of the program director. For scheduling options and additional course information, please see the George Brown course calendar or the *Continuing Education* section of their website at www.gbrownc.on.ca. For distance learning alternatives please see the Ontario Learn website at www.ontariolearn.com.

CHEM 9004 Chemistry for Health Sciences (George Brown College)

Prerequisite: Grade 11 Math, Grade 12 English.

This course is not currently offered by George Brown College and there is no distance equivalent available from Ontario Learn. The following alternative is therefore recommended:
